

How learners sign in, how staff assign courses, and how it's all tracked

Our clinical platform runs Moodle 4.5, a long-term support release, in the AWS environment described on the companion one-pager. It holds 26 courses in English, 23 of them also in Spanish, plus a staff resource library.

SIGN-IN (SSO)

- LIVE** **Tablet sign-in plugin:** today the tablet passes a learner ID at launch, and the account is opened or created automatically
- LIVE** No self-registration: learner accounts come only from the tablet sign-in or from staff
- LIVE** Staff can look up a learner by ID
- READY TO SET UP** For Orijin, a **signed** launch with **LTI 1.3** (Moodle's built-in "Publish as LTI tool") or OAuth 2 / OpenID Connect

TRACKING & REPORTING

- LIVE** Activity and course completion tracking
- LIVE** Conditional access: the next step unlocks when the last one is done
- LIVE** Built-in custom report builder
- LIVE** REST web services turned on, the base for a reporting API
- READY TO SET UP** Weekly usage reports for Orijin by facility, course and week

CONTENT & CLINICAL TOOLS

- LIVE** Interactive courses (SCORM and H5P), video lessons, and a staff library of printable workbooks and facilitator guides
- READY TO SET UP** **Secure forms** built with Moodle's Feedback and Database activities, kept in our BAA-covered environment

ASSIGNING COURSES

- LIVE** **Bulk enrollment:** assign a course to many learners at once
- LIVE** Manual, cohort and self-enrollment, so open courses can be chosen by learners
- READY TO SET UP** Staff approval for diagnosis-specific courses
- READY TO SET UP** Facility separation with categories, cohorts and roles, so staff only see their own site

CERTIFICATES

- LIVE** **Custom certificates** issued on completion, with verification code and QR code options
- LIVE** A "My certificates" view for each learner

LOCKED DOWN BY DESIGN

- LIVE** Site messaging, blogs and chat turned off
- LIVE** No outside links in course content
- LIVE** Data privacy tool for data requests and retention

COMING NEXT

Screeners with scheduled rechecks, release planning matched to the county or state, course access after release, and secure video sessions for telehealth.

HOW IT CONNECTS TO ORIJIN

LTI 1.3 launch from your Canvas for courses, plus a read-only reporting API or weekly export for your sales team.
